OWEGBE JOHN OSEREME

WEB DEVELOPER | AI-ASSISTED WEB & APPLICATION DEVELOPMENT

Nigeria | Owegbejohn07@gmail.com | LinkedIn | Portfolio
Remy AI GitHub | Remy Scout GitHub | Remy AI | Remy Scout

PROFESSIONAL SUMMARY

Web Developer specialising in AI-assisted web and application development, with hands-on experience directing the build and improvement of live web and mobile products through natural-language instructions to AI coding environments. Creator of Remy AI and Remy Scout. Experience includes integrating third-party services such as Paystack, connecting databases, implementing user authentication, testing application features, troubleshooting issues and coordinating deployment. Uses AI development tools to translate product requirements into working application features.

SKILLS

Web & Application Development: AI-assisted web development, AI-assisted application development, frontend and backend feature direction, responsive interface development, application feature implementation.

Integrations & Application Services: Third-party API integration, Paystack integration, database connectivity, user authentication, registration and login flows, password-reset flows.

Development Workflow: Natural-language requirements and prompting, AI-directed coding, feature testing, issue identification, troubleshooting, deployment coordination.

Tools & Platforms: OpenCode, OpenAI Codex, Claude, Cursor, GitHub, Netlify, Cloudflare, Render, PostgreSQL, Neon, Android Studio.

PROJECTS

Remy AI — Creator & AI-Assisted Application Developer

Live application | GitHub repository

- Created and directed the development of an AI assistant application, translating product requirements into natural-language instructions for AI coding tools.
- Integrated third-party services, including Paystack, and directed database connectivity and user-authentication implementation.
- Worked on intelligent chat and task-oriented application functionality; tested features, identified issues and instructed AI tools to make corrections.
- Managed the AI-assisted development workflow and deployment of the live application.

Remy Scout — Creator & AI-Assisted Application Developer

Live application | GitHub repository

- Created and directed the development of an opportunity-discovery platform for finding jobs, freelance clients and projects.
- Integrated third-party services and directed database connectivity and user-authentication implementation.
- Tested application workflows, identified issues and used AI coding tools to refine features and resolve problems.
- Worked on the application's interface and deployment for access through its live website.

EXPERIENCE

AI-Assisted Web & Application Development — Qubators

December 2025 – November 2026

- Built practical web and application development experience by translating product requirements into clear natural-language instructions for AI coding environments.
- Directed AI tools including OpenCode and OpenAI Codex to implement, refine and troubleshoot application features.
- Worked on API integrations, database connections, authentication flows, testing and deployment across personal application projects.
- Applied an iterative development workflow: describe requirements, review application behaviour, identify issues and direct corrections.

EDUCATION & CERTIFICATION

University of Ilorin

Bachelor of Education (B.Ed.), Electrical and Electronics Technology Education | Graduated 28 August 2024

Certification: Qubators — AI Foundry
