OWEGBE JOHN OSEREME

AI-ASSISTED WEB & APP DEVELOPER | AI AUTOMATION SPECIALIST

Email: Owegbejohn07@gmail.com | LinkedIn: linkedin.com/in/john-owegbe |
Portfolio: johnowegbe.netlify.app | Live Project: remyaii.netlify.app | GitHub: github.com/remyd7th/REMY-AI

PROFESSIONAL SUMMARY

AI-Assisted Web & App Developer passionate about using artificial intelligence and modern development tools to build, improve, test, and deploy practical digital applications. Creator of Remy AI, an AI-powered assistant designed to simplify administrative activities, organize tasks, and support workflow automation. Experienced in AI-assisted application development, prompt engineering, interface improvement, troubleshooting, and deployment. Combines technical problem-solving skills with a strong interest in building useful, user-focused web and mobile applications.

CORE SKILLS

- AI-Assisted Web Application Development
- Mobile Application Development
- AI-Powered Application Development
- AI Automation & Workflow Design
- AI Assistants & Intelligent Chat
- Prompt Engineering & Generative AI
- User Interface (UI) / User Experience (UX) Skills
- Application Testing & Debugging
- GitHub & Version Control
- Technical Problem-Solving

TECHNICAL TOOLS & TECHNOLOGIES

AI-Assisted Development: OpenCode, Codex, and AI-powered coding tools
Version Control: GitHub
Deployment & Hosting: Netlify, Cloudflare, Render
AI Integration: Groq
Database Technologies: PostgreSQL, Neon
Infrastructure: Netcup
Mobile Development: Android Studio

PROJECT EXPERIENCE

Creator & Developer — Remy AI (AI-Powered Assistant) **Live: remyaii.netlify.app**

- Built Remy AI, an AI-powered assistant designed to simplify administrative activities, organize tasks, and improve productivity.
- Developed features supporting intelligent chat, task management, approval-based actions, and workflow assistance.
- Used AI-assisted development tools to build, refine, and troubleshoot application features.
- Worked on UI/UX improvements to create a more organized and user-friendly experience.
- Deployed the web application through Netlify and maintained the project repository using GitHub.
- Worked on an Android application version using Android Studio.
- Explored practical applications of AI integration and workflow automation in a digital assistant.

PROFESSIONAL EXPERIENCE

AI Automation Intern — Qubators **Two-Month Internship**

- Completed a two-month internship focused on AI automation and practical applications of AI-powered tools.
- Developed practical familiarity with prompt engineering, workflow design, and AI-assisted problem-solving.
- Explored ways to apply AI tools to everyday processes and productivity challenges.
- Applied learning through practical project development, including work on Remy AI.
- Earned an AI Automation certification from Qubators.

EDUCATION

University of Ilorin — Bachelor of Education (B.Ed.) in Electrical and Electronics Technology Education
Graduated: 28 August 2024

CERTIFICATION

Qubators — AI Automation Certification
