OWEGBE JOHN OSEREME

AI AUTOMATION SPECIALIST

Lagos, Nigeria | 08134319568 | Owegbejohn07@gmail.com

LinkedIn: linkedin.com/in/john-owegbe | GitHub: github.com/remyd7th/REMY-AI | Live Project: remyaii.netlify.app

PROFESSIONAL SUMMARY

AI Automation Specialist with practical experience in AI-assisted application development, workflow improvement, and AI-powered productivity solutions. Built and deployed Remy AI, an AI assistant project designed to support everyday business workflows. Experienced in AI-assisted coding, prompt refinement, product development, version control, and web application deployment. Completed AI automation training and a two-month internship with Qubators, gaining practical experience in translating product requirements into application features and refining AI-powered user experiences. Focused on building practical AI solutions that simplify workflows and improve operational efficiency.

TECHNICAL SKILLS

AI & App Development	OpenCode, AI builder tools, Codex for AI-assisted development, Prompt engineering & iterative prompt refinement, AI model access via Groq, AI-powered application development, Workflow automation concepts, Product feature planning, Interface refinement, Design-system documentation
Development & Deployment	GitHub (source control and project management), Netlify (web application deployment)
Supporting Technologies	Neon, PostgreSQL, Cloudflare, Render, Netcup

PROJECT EXPERIENCE

Remy AI — AI-Powered Assistant | *Personal Project (Built & Deployed)* Live

- Built and deployed an AI-powered assistant designed to support executive assistants, virtual assistants, business owners, and busy professionals with everyday work.
- Developed a unified application interface with dedicated areas for chat, tasks, calendar, approvals, inbox, documents, follow-ups, and activity.
- Used AI-assisted development tools to translate product requirements into application features and refine the interface through iterative development.
- Managed project code via GitHub and deployed the web application using Netlify, accessing AI models through Groq during development.
- Created design-system documentation covering interface structure, visual tokens, navigation priorities, and approval-related interaction patterns.
- Focused on applying AI to everyday workflows, including communication assistance, task coordination, scheduling support, and productivity management.

PROFESSIONAL EXPERIENCE

AI Automation Intern — *Qubators* 2-Month Internship

- Applied AI automation concepts to practical application development and workflow improvement activities.
- Used AI-assisted development tools to build and refine application features.
- Contributed to developing and improving Remy AI, an AI-powered assistant project.
- Worked on product requirements, prompt refinement, interface improvements, and technical documentation.
- Used GitHub for project version management and Netlify for application deployment.
- Gained practical experience translating product ideas into a working web application and improving the user experience through iterative development.

EDUCATION

Bachelor's Degree in Electrical and Electronics Technology Education Completed: 28 August 2024

University of Ilorin | *Second Class Lower*

CERTIFICATIONS

AI Automation Certification — *Qubators*

Virtual Assistant Certification — *ALX*

ADDITIONAL INFORMATION

- **Focus Areas:** AI automation, AI-assisted application development, workflow improvement, and AI-powered business solutions.
